

INDIAN PROFESSIONAL PILOT PROGRAM

We at the **Corporate Wings & Aviation Technology Pvt. Ltd. (CWAT)** offer a complete package for Commercial Pilot's License training. We specialize in Pilot Training program and have affiliation with reputed flying schools abroad. These flying schools have been in operation for long time and excel in their training programs. Most of the flying schools have flying instructor of Indian origin and are well informed regarding Indian D G C A rules and regulations. A large number of trainees who have finished their flying from these schools are employed as Captains and First officers with different Airlines in India.

CWAT Pvt. Ltd. is more than 15 years old company and has trained close to 500 candidates both in Canada & USA. Many of the students trained by CWAT are already flying as First Officers and Captains in reputed airlines like Alliance Air, Indian Airlines, Indigo and Jet Airways.

CWAT Pvt. Ltd. is owned and managed by **Capt. Jatinder K. Dogra** who has more than 25 years of Aviation experience. He is presently flying as Senior Commander on Boeing 737 NG with one of the reputed airline in India. He is also type rated on Bombardier CRJ-200, Cessna Citation II, Beach King Air C-90, Piper Chieftains "Panther", Cessna 404 "Titan" to name a few. Besides being a Pilot, he is an Aviation Engineer also and holds most of the engineering Licenses.

He has visited all the flying school in Canada/ USA, where CWAT Pvt. Ltd. has a tie up. He has met with the owner, Chief Flying Instructor, flying instructors and engineers in person. CFI's were interviewed, planes were inspected and their maintenance records were carefully examined. Only those schools were selected which met the required standards. This will not give only result in high quality flying for trainee pilots but will also be **COST EFFECTIVE**. Our aim is to save every single dollar of trainee where ever possible.

All the flying clubs are approved by **Transport Canada / FAA** as such they are acceptable to **Director General of Civil Aviation** office in India. All the planes being in use for flying training abroad are acceptable to DGCA and are currently flying in India. There is no compromise on quality of flying training. If some trainee Pilot does not achieve the standard expected by the instructors, he / she may have to carry out extra flying. Even after extra flying, if standards are not achieved, his/her flying may be discontinued. It is re-iterated that there would be no compromise on quality of flying and standards.

Most of our training facilities abroad have dual runways and are equipped with Instrument Landing system (I L S), V O R approaches, and NDB approaches. Airports offer controlled and uncontrolled airspace. All the facilities have fair amount of domestic traffic allowing good flying experience. All the facilities are night flying equipped.

SkyQuest Aviation Ltd. is Transport Canada approved located at Langley, Vancouver, Canada. Airport has very good weather for flying even during winter because it does not snow much in Vancouver. This small airport has control tower with dual runway and night flying facilities. SkyQuest Aviation Ltd. has sufficient number of planes such as Cessna C-152, Cessna-172, Piper Seneca PA-34 and Beach Duchess BE76.

There are many airports in the vicinity with adequate NAV aids such as VOR, NDB and many of the airports have ILS so there are no problems regarding 100 NM Cross Country & Instrument flying. SkyQuest aviation academy has been into operation from so many years and they have trained many Indian students in the past as a result they are well versed with Indian (DGCA) rules and regulations. SkyQuest aviation has sufficient number of well experienced flight Instructors to ensure best quality of flying.

CWAT has an official tie up with SkyQuest Aviation Ltd. and shall ensure that the students will get complete CPL package, at reasonable cost, in shortest possible time, without compromising with the quality. SkyQuest has in house Transport Canada examinations center for both RTR & PPL written exams. SkyQuest aviation Ltd. has state of art Single engine and multi-engine simulator within the school.

Types of aircrafts available for flying training

Aircraft	Type	No. Of Hours
Cessna 152	: Single Engine	175:00 hours
Cessna 172	: Single Engine	10:00 hours
Piper PA-34 Seneca	: Multi Engine	10:00 hours
Beach Duchess BE 76	: Multi- Engine	05:00 hours
Total Flying hours	:	200:00 hours
* Single Engine simulator	:	10:00 hours
* Multi-Engine simulator	:	10:00 hours
Total Simulator hours	:	20:00 hours

200 hours flying break down according to DGCA requirements:-

- a) 100 hours solo SE - out of which 50 hours should be 100 NM solo X-country including 300nm XC
- b) 85 hours dual
- c) 15 hours multi engine
- d) 40 hours of instrument flying - out of which 20 hours should be IF (under-hood) and 20 hours on simulator

Ground classes for PPL / CPL general subjects / RTR examination/Technical Examination on both Single Engine / Multi-Engine shall be in house.

Total Cost of flying Training : \$ 45,000 CAD Approx.
